Field Day 2009

A reminder that Field Day is coming the last week-end of June and would invite all local Amateur Operators to come and join in on the F/D activities that will take place starting Friday afternoon June 26th around 3 pm and ending Sunday noon June 28th. Again this year we will be operating from the Cuyuna Country State Recreation Area Cuyuna Overlook. We are having breakfast Saturday at 8 am in Crosby at Marv's North Country Café and then its up the hill to get started setting up and operating for another fun filled Field Day exercise. Have your 2M H/T or mobile rig on 147.225 to keep in touch with all that is going on and to stay informed on any activity changes that might occur during the BAARC 2009 Field Day Exercise. You can operate the Club Station from the ECOM Trailer or bring your own antenna and equipment and see how well your portable station will work. If you like you can camp overnight or just come for the day.

If you want to take a break from the F/D activities bring your GPS and go hunting in the Park for a Geocache. You just might

find something very interesting. Looking forward to another great BAARC F/D activity. Hope to see you there.
